

Fictional Technical Drawing for Training Only

Part: EV Reducer Input Shaft | Drawing No.: ND-IS-042 Rev.A

NOTES / HEAT TREAT REQUIREMENTS

1. All dimensions in mm. Part supplied after machining.
2. Material: SCM420H (customer supplied).
3. Effective case depth on sections C and D: 0.45–0.65 mm @ HV550.
4. Surface hardness: HRC 58–62.
5. Core hardness: HRC 30–42.
6. Total runout after heat treatment on datum A to D: ≤ 0.03 mm.
7. No grinding correction after heat treatment.
8. Threaded end masking / no-heat-treat zone: not specified in RFQ.
9. Visual + hardness inspection required; detailed sampling plan not attached.
